Life Cycle of Medicinal Products

Development steps: 2016-2021

Expert Evaluation of Medicinal Products

- ❑ Expert evaluation of preclinical studies results and documents for conducting clinical trials in Russia (including IMCTs).
- ❑ Examination of drug authorisation documentation and post-authorisation changes (quality, efficacy & safety).
- ❑ Documentary and laboratory expert evaluation of drug quality during authorisation
- ❑ Evaluation of interchangeability ("Russian "Orange Book")
- ❑ Maintenance of the Drug Register in Russia
- ❑ Certification of immunobiological drugs
- ❑ Scientific activities: research, development of monographs and other texts for the Russian Pharmacopoeia, publication of three scientific journals
- ❑ Educational work

Methods of Expert Evaluation
